

Driving Supply Chain Predictability with Microsoft Dynamics 365

From Supply Chain Disruption to Predictable Performance

Supply chain teams today are challenged by unpredictable demand, supplier volatility, and the growing need for real-time visibility.

Microsoft Dynamics 365
Supply Chain Management

At Endeavor4, we help guide operations and supply chain leaders to build smarter, more resilient, and agile supply chains with Microsoft Dynamics 365 Supply Chain Management (SCM).

Common Supply Chain Challenges	Incremental Digital Transformation
Demand volatility and unpredictable customer expectations	Improved forecasting accuracy and demand planning
Rising logistics and warehousing costs	Automated and optimized warehouse and distribution operations
Supplier risk and global disruptions	Integrated supplier visibility and risk management
Pressure for real-time visibility and agility	Real-time analytics and proactive supply chain insights

Core Supply Chain Capabilities Delivered

Our consultants have hands-on experience across the full breadth of Dynamics 365 Supply Chain Management capabilities, including:

- Product information management
- Sales and procurement processes
- Vendor collaboration
- Inventory management and quality control
- Warehouse management and mobile app
- Master planning and planning optimization
- Asset and transportation management
- Landed cost and global trade compliance
- Copilot in Dynamics 365 Supply Chain Management

We help clients leverage the full potential of Dynamics 365 Finance and Supply Chain Management by aligning the right set of modules with business priorities, ensuring end-to-end supply chain visibility, and improving operational efficiency.
